

Helpful hints:

Make sure you have a big enough sail for the conditions !

If sail feels underpowered-1. Too much outhaul, ease outhaul out 1/2" to 1". 2. Mast is too long or too stiff. 3. Sail is too small.

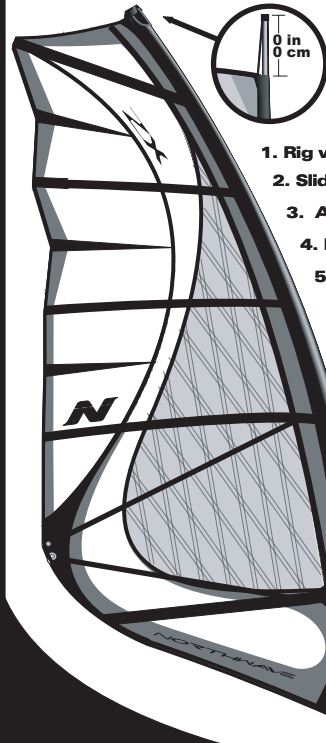

If sail feels twitchy-1. Too much outhaul, decrease outhaul 1/2" to 1".

Vertical Wrinkles on Batten Sleeves- 1. Tighten Autobatten 1/2" then sail 1 hour for tension to distribute. Repeat until wrinkles are gone. Do not overtension and create "s" curve in bottom batten.

If sail overpowers easily- 1. Too little downhaul, ease off outhaul 1/2". 2. Not enough outhaul, increase outhaul 1/2". 3. Sail is too big for conditions.

If sail feels heavy and dead- 1. Not enough outhaul, increase outhaul by 1/2" to 1". 2. Try shorter lighter mast.

Contact Northwave USA 1-541-386-6156 and speak to a real person for any assistance! We want you ripping!!!!

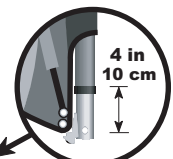

Rigging Basics

1. Rig with Logo up and battens below mast
2. Slide boom opening closed, insert mast.
3. Adjust base.
4. Down-haul sail to desired setting.
5. Attach boom and outhaul.

**4' 10 in - 5' 0 in
147cm - 152cm**

Measure Inside to Inside

Measure from mast butt to cleat

3.7 Optimum Mast 370/23
